Additional Information

The caller reports there was an explosion at the Doe Run Facility sometime last night or the early morning hours.

EER contacted the Doe Run Company and spoke to Gary Hughef, Manager of the facility. Mr. Hughef explained they had an explosion in the refinery area at 2340 hours last night. The explosion occurred in the #10 kettle. Two employees were injured and transported to a hospital. Doe Run is currently investigating how the explosion occurred. Mr. Hughef reported there were no changes to the air monitoring data. There appears to be no environmental impact.

There was no structural damage, just some siding in the area.

Doe Run issued a press release regarding the incident.

The information in this report is reported to DNR by outside parties. The fact that a release or spill has been reported does not necessarily mean that there has been a release or spill, or that a site is contaminated. Information in this report may be updated from time to time. For a complete copy of the file, please contact the Custodian of Records for the Environmental Services Program at (573) 526-3349.
